FUEL IDENTIFICATION

- Even a very small amount of petrol in the diesel or the wrong mixture ratio of diesel/biodiesel can cause problems in the fuel system:
- Corrosion of engine parts
- Risk of engine damage.
- With the use of our test equipment we provide you with the right diagnostics instruments

ETHANOL MEASUREMENT KIT

item number :
EMK 01 (110805_1)

DESCRIPTION

- For detection and measurement of the ethanol concentration of a fuel probe.

SCOPE OF DELIVERY

- 1 measurement flask
- 1 measurement cylinder 500 ml
- 1 measurement cylinder 100 ml
- 1 cleaning brush
- 10 pipets
- 1 coloring liquid LT 02
- delivery in solid plastic case

FUEL IDENTIFICATION KIT

item number :

KIK 01_LR (110804_1)

DESCRIPTION

- The smallest quantities of gasoline in a common rail system lead to the corrosion of engine parts, which later causes individual components to fail.
- The use of the BD 01 petrol detector guarantees the detection of contaminated fuel, from a percentage as small as 0.2 % gasoline in a diesel system.
- In the area of motor vehicle servicing, it is a great help to be able to identify fuel **before** extensive measurements are carried out on the system pressure and for leaks etc. Power is supplied by the 12V/DC vehicle electrical system.

SCOPE OF DELIVERY

- 1 petrol detector 12 V/DC
- 1 measuring cylinder 500 ml
- 1 hydrometer (for density determination)
- 1 hook up clips NSVA 100
- 1 cleaning brush
- 50 pcs filter pads

Supplied in a solid plastic case

FUEL IDENTIFICATION KIT

item number :

KIK 02_LR (110803_1)

DESCRIPTION

- The smallest quantities of gasoline in a common rail system lead to the corrosion of engine parts, which later causes individual components to fail.
- The use of the BD 01 petrol detector guarantees the detection of contaminated fuel, from a percentage as small as 0.2 % gasoline in a diesel system.
- In the area of motor vehicle servicing, it is a great help to be able to identify fuel **before** extensive measurements are carried out on the system pressure and for leaks etc. Power is supplied by the 12V/DC vehicle electrical system.

SCOPE OF DELIVERY

- 1 petrol detector 12 V/DC
- 1 measuring cylinder 500 ml
- 1 hook up clips NSVA 100
- 1 cleaning brush
- 50 pcs filter pads
- 1 solid plastic case

DIESEL MIXTURE TESTER

item number :
DMP 01 (110801_1)

DESCRIPTION

- If a not suitably equipped diesel engine is refuelled with a diesel/biodiesel mixture, there is a possibility that the engine will be damaged.
- The DMP 01 diesel mixture tester was developed to determine this mixture ratio.
- easy and reliable to use
- quick testing possible on sit
- wear-free testing
- Tester for measuring the mixture ratio of biodiesel and diesel fuel based on the principle of density measurement.
- The instrument permits rapid, reliable testing by sampling fuel direct from the tank.
- The test result is displayed on a coloured scale (see pic.).

SPARE PARTS

- ET 553 (111598) plastic zylinder
- ET 561 (111607) hydrometer
- ET 562 (111608) cleaning brush
- ET 57.1 (120102_1) plastic case

FUEL IDENTIFICATION DEVICE

item number :
DMP 02 (110802_1)

DESCRIPTION

- The use of the fuel identification device enables definition of the fuel type in events of possible damage to the fuel system.
- rapid measurement possible on-site
- in diesel systems - diesel or biodiesel
- in otto/bifuel systems - petrol, E 85 or E 100 ethanol
- indication via measurement device with colour scale
- By removing 500 ml of fuel from the fuel tank, a clear statement can be made about the fuel type used.
- Measurement results are based on an ambient temperature of 20 °C.
- Note: The DMP 02 identification device does not give judicially useable measurement results.

SCOPE OF DELIVERY

Supply in a robust plastic case.

SPARE PARTS

- ET 662 (111709) measuring device
- ET 663 (111710) measuring cylinder
- ET 562 (111608) cleaning brush
- ET 58 (111711_1) plastic case B 2.3
