ACCESSORIES FOR MANUAL VACUUM EXTRACTION AND METERING PUMPS

- A large selection of adapters with different shapes and lengths is available for the hand suction pumps and hand metering pumps.
- These adapters make it possible to work in tight spaces or difficult to access places in the engine compartment.
- When an adapter is used, the hose connection on the hand pump is replaced with the required HAPA adapter with G 1/4 thread.
- Adapters no. 8 and 9 feature a hose connection and can be used with the suction and pressure hose supplied.
